

DIAMABRUSH™ MASTIC TOOL

NEW PRODUCT ENHANCEMENT!!

Effective January 24th, 2011

We are pleased to announce our latest product enhancement to our Diamabrush Mastic Tool!

As we strive to always offer the best possible tools, we are now releasing an improvement to the Mastic tool. This enhancement includes the addition of blades to the various sizes of our Mastic tool.

The additional blades offer:

- **Longer tool productivity**
- **Increased product durability**
- **Overall lower cost to the end user, per square foot**

Some of the tools will be increasing in cost, but with the enhanced production life of the tool, and the already low end user cost, these increases are minimal.

The additional blades will be as follows:

- **14", 15", 16" tools will have 1 additional blade added, totaling 6**
- **17", 18" tools will have 3 additional blades, totaling 8**
- **19", 20" tools will have 5 additional blades, totaling 10**

Additionally, we will be adding blades to the corresponding blade replacement kits as well.

Listed below are the new prices for these changes, which take effect on January 24th, 2011. Please contact your sales representative should you have any questions.
