

MALISH

YOUR GLOBAL PARTNER FOR ROTARY, CYLINDRICAL AND SPECIALTY BRUSHES

Combining manufacturing capabilities in Dong Guan City, Guang Dong, China, with engineering and manufacturing facilities in Willoughby, Ohio, USA, Malish brings a unique combination of talents to any opportunity.

Both facilities manufacture products designed and built to the most stringent international quality standards.

# Service

MALISH

# Quality

Since 1948, Malish has offered an unrivaled combination of quality products, facilities, processes, logistics, and most of all, people, to meet the needs of any OEM brush customer.

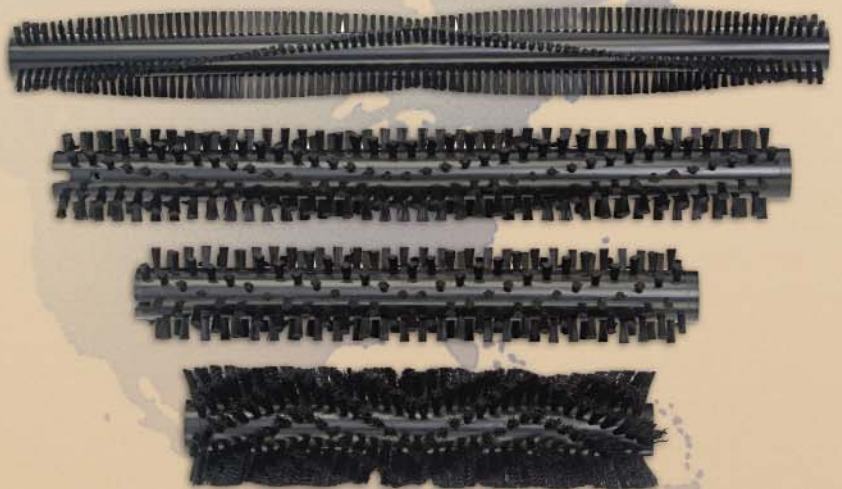

# Performance

Malish has a state-of-the-art, fully-integrated extruded plastic processing facility in the US as well as complete injection molding capabilities in our ISO-certified manufacturing facility in China. Skilled technicians and machine operators assure the highest quality products. Combined with a sales office in Europe, Malish now offers sales and distribution capabilities on three continents.

A technology-driven, global leader in the engineering and manufacturing of all types of pad drivers, rotary, cylindrical, and specialty brushes, Malish can manufacture products and manage projects that help make our customers more successful.
